+ Sub Query

Sub Query Type

Style: Basic Advanced

Type:  Union

 Append

 I want to add new data to my master query results table with columns from this subquery table vertically from different data sources.

Source System

Data Source: ▼

Ski Team is the demonstration and tutorial database.

View: ▼

This is a tutorial view for training and demo purposes.

Sub Query Type

Style: Basic Advanced

Type: Union
 Append
 Minus
 Intersect

 I want to only display results in my report that appear in my master query but that do not exist in this sub query.

Source System

Data Source: Ski Team

Ski Team is the demonstration and tutorial database.
