

- My

The figure displays two side-by-side screenshots of a web application interface, likely a course management system. Both screenshots show a page titled 'Lecture 1'. The left screenshot shows a 'Lecture 1' button and a 'Lecture 1' button. The right screenshot shows a 'Lecture 1' button and a 'Lecture 1' button.

-
- The screenshot shows the RStudio environment. The script editor on the left contains the following R code:
- ```
Import data
library(tidyverse)
library(readr)

Import data
df = read_csv("data.csv")

Summarize data
df %>% summarise(n = n())
```
- The console window on the right shows the output of the code:
- ```
#> # A tibble: 1 x 1
#>   n
#>   <dbl>
#> 1 1000
```
