**Email**

Let's make this easy.

You can configure all email related settings here, including default addresses and outgoing server settings.

Remember to save your changes before navigating away from Email settings.

Need help?

Visit the [Yellowfin forum](#) or [wiki](#) to find the answers you are looking for.

**General Settings**

**Outgoing Mail Server**

**Region**

Let's make this easy.

You can configure all region related settings here, including time & date and language specific text settings.

Remember to save your changes before navigating away from Region settings.

Need help?

Visit the [Yellowfin forum](#) or [wiki](#) to find the answers you are looking for.

The interface shows a header with icons for envelope, gear, globe, lock, and link. Below is a sidebar with the 'Region' title and a message about making it easy. It also includes a note about saving changes and a 'Need help?' section linking to forums and wiki. The main area contains three expandable sections: 'Time & Date Settings', 'Text Formats', and 'Language Settings'.
