+ Sub Query

Sub Query Type

Style: ☐ Basic ☒ Advanced

Type: ☐ Union ☒ Append

 I want to add new data to my master query results table with columns from this subquery table vertically from different data sources.

Source System

Data Source:

Ski Team

Ski Team is the demonstration and tutorial database.

View:

Ski Team Advanced

This is a tutorial view for training and demo purposes.

Sub Query Type

Style: ☐ Basic ☒ Advanced

Type: ☐ Union
☐ Append
☒ Minus
☐ Intersect

 I want to only display results in my report that appear in my master query but that do not exist in this sub query.
